

LLN QUIZ · PRE-TRAINING REVIEW

LLN Quiz: RIIHAN201E Operate a forklift

RIIHAN201E · Operate a forklift

This quiz helps us understand your language, literacy, and numeracy skills to support you in your training. Please answer all questions to the best of your ability.

Reading

1. Read the warning sign below:

'WARNING: Maximum load capacity 2500 kg. Do not exceed.'

What is the heaviest load you can safely lift with this forklift?

- a) 2000 kg
- b) 2500 kg
- c) 3000 kg

Writing

2. During your pre-start check, you find that the forklift's horn is not working. Write one sentence in the maintenance log to report this fault.

Numeracy

3. You need to lift a pallet of cement bags. The pallet itself weighs 20 kg. There are 40 bags of cement on the pallet, and each bag weighs 20 kg. What is the total weight of the load you need to lift?

Oral Communication

4. Your supervisor has asked you to move 'the blue pallets' to Bay 7. You see two different stacks of blue pallets. The assessor will play the role of your supervisor. Ask the supervisor a question to make sure you move the correct pallets.

Learning

5. If you were unsure how to correctly attach a new type of lifting attachment to the forklift, what is one thing you could do to find the correct procedure?
